Why Choose this Training Course?

This training course is designed to equip participants with the knowledge and skills needed to implement agile supply chain management practices in their organizations. The course covers a wide range of topics related to ASCM, including customer-focused supply chain design, lean and agile manufacturing, agile procurement and sourcing, agile logistics and transportation, agile quality and compliance, and agile supply chain performance and measurement. The training course includes a combination of lectures, case studies, group discussions, and hands-on exercises to ensure maximum learning and engagement.

This training course will feature:

Definition of Agile Supply Chain Management (ASCM)
Overview of the benefits of ASCM
Comparison of traditional supply chain management and ASCM
Implementation challenges and considerations

What are the Goals?

By the end of this training course, participants will be able to:

Understand the principles of ASCM and its applications
Develop a strategic ASCM plan
Implement agile practices in supply chain management
Improve supply chain performance and responsiveness
Enhance collaboration and communication within the supply chain network

Who is this Training Course for?

This training course is suitable to a wide range of professionals but will greatly benefit:

Supply chain managers and directors
Operations managers
Procurement and purchasing managers
Logistics and transportation managers
Inventory and materials managers
Quality and compliance managers
Business and operations analysts
